## Personal Statement

I am A very chilled out person who loves life and at present am finding it a very peaceful happy place to be. I have been on two 1 year travelling stints, on the first I travelled to America, Fiji, New Zealand, Oz, Thailand, Cambodia, Vietnam, Malaysia, Bali and India. While I was away my eyes were truly opened as to what life is like outside of the UK and I had some of the most incredible experiences and met some amazing people, it really made me change my attitude towards life. Prior my driving factor was money I wanted to be a millionaire, afterwards I just wanted to help people being that I have lived such a blessed privileged life. My second trip with this in mind started with my plans to help, so I went to Mexico to volunteer at a day care centre for kids who have unfortunate living conditions. I volunteered for 3 months and it was amazing this kind of work is not only healing for the kids but for everyone involved. After I travelled the rest of Mexico and it was there that I became more aware, more conscious and spiritual THANK YOU MEXICO.

At present I work as a massage therapist at a Day Spa and also I am working / training to be a mentor for people with intimacy issues. Before this I worked in banking/broking since leaving school at 17.
