Personal Statement

I am currently making a career change after over 30 years in a corporate environment. I think that this makes me very aware of some of the most common stresses of modern life that massage can relieve. I have always had an interest in physiotherapist but opted to take a massage course so I could start to help people more quickly. I am now enjoying helping friends and relatives with their aches and pains, but would like to keep learning and help more people.

I enjoy working in teams, meeting new people, developing my skills and helping other people. I am hardworking and can work well on my own using my own initiative but am equally happy to follow instructions as required.

I am really happy that massage will bring me fulfillment in a new phase in my life.
